ServiceNow: Standard Laptop Task Flow

Part 1: Create the Flow and Trigger

1. Open ServiceNow.
2. Click on **All** >> search for **Flow Designer**.
3. Click on **Flow Designer** under **Process Automation**.
4. After opening Flow Designer, click on **New** and select **Flow**.
5. Under Flow properties, give Flow Name as "**Standard laptop task**".
6. Application should be **Global**.
7. Select Run user as "**System user**" from the choices.
8. Click on **Submit**.

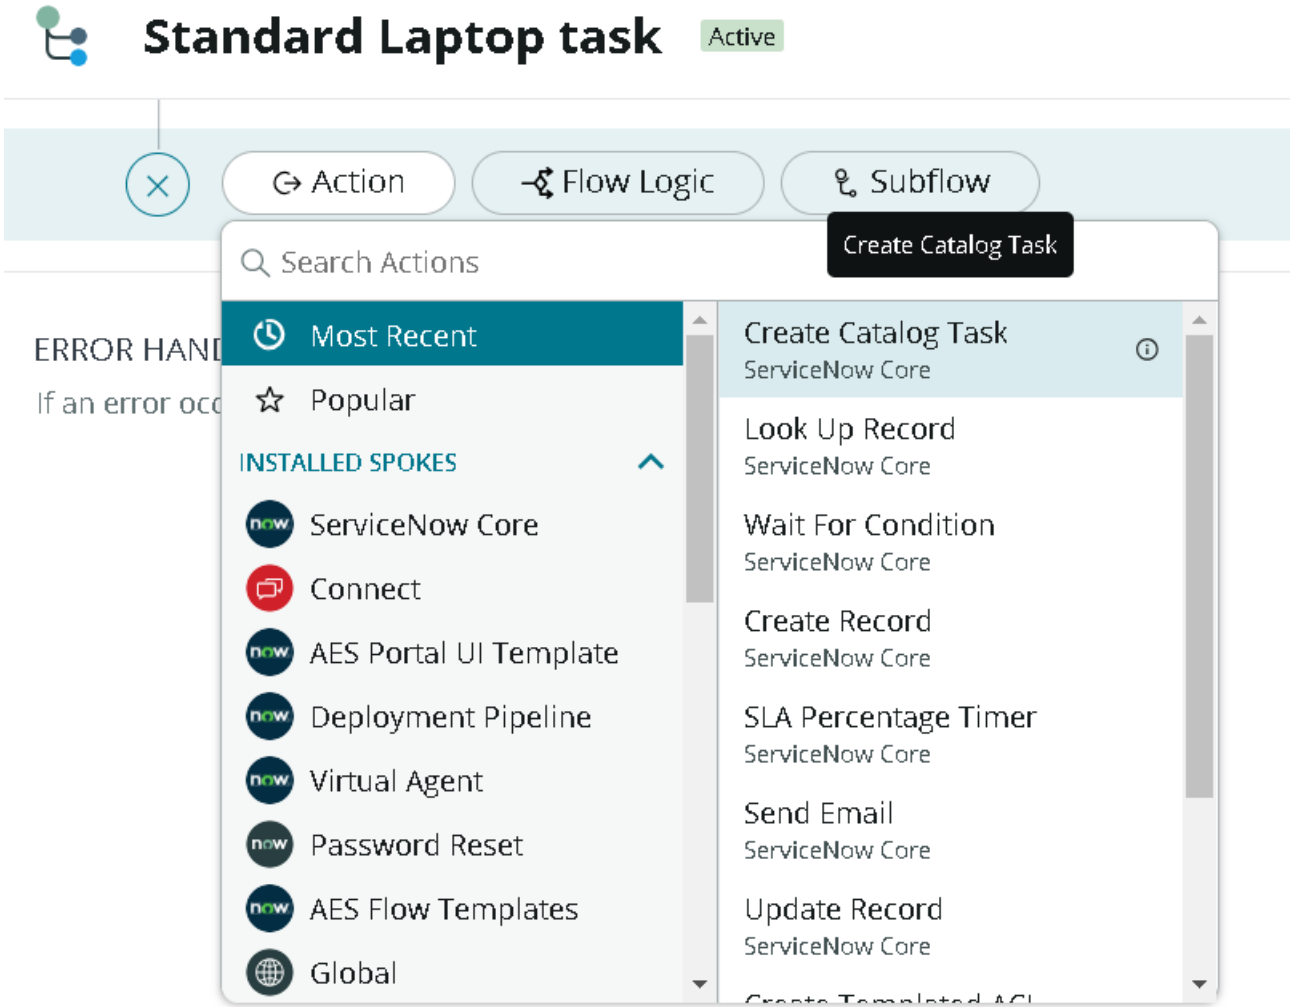

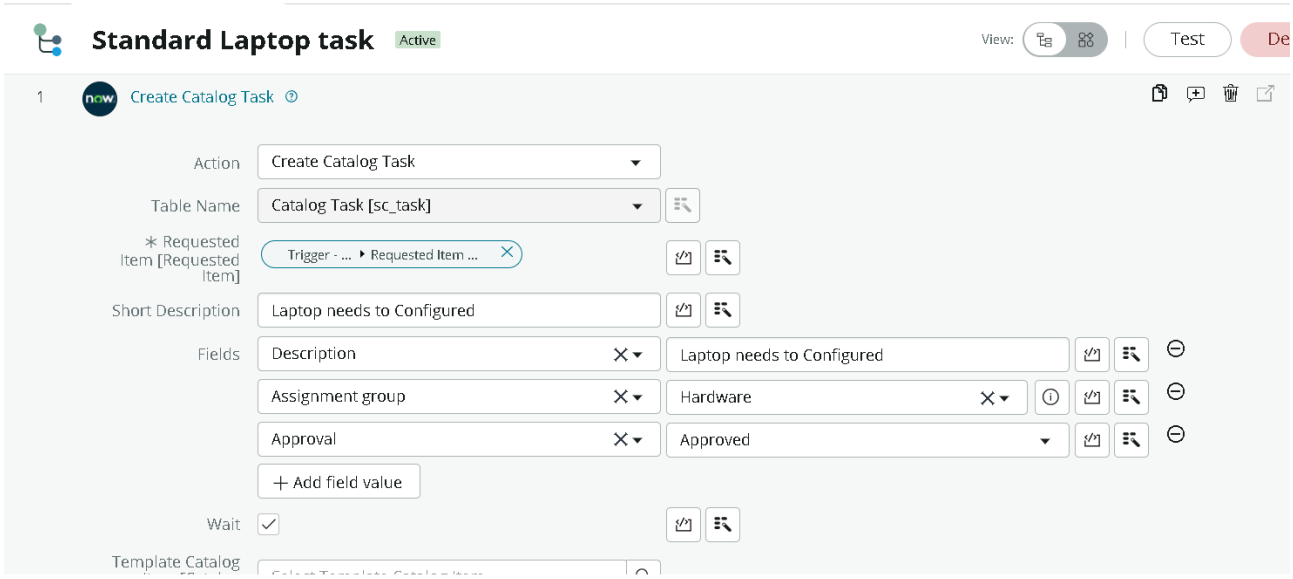

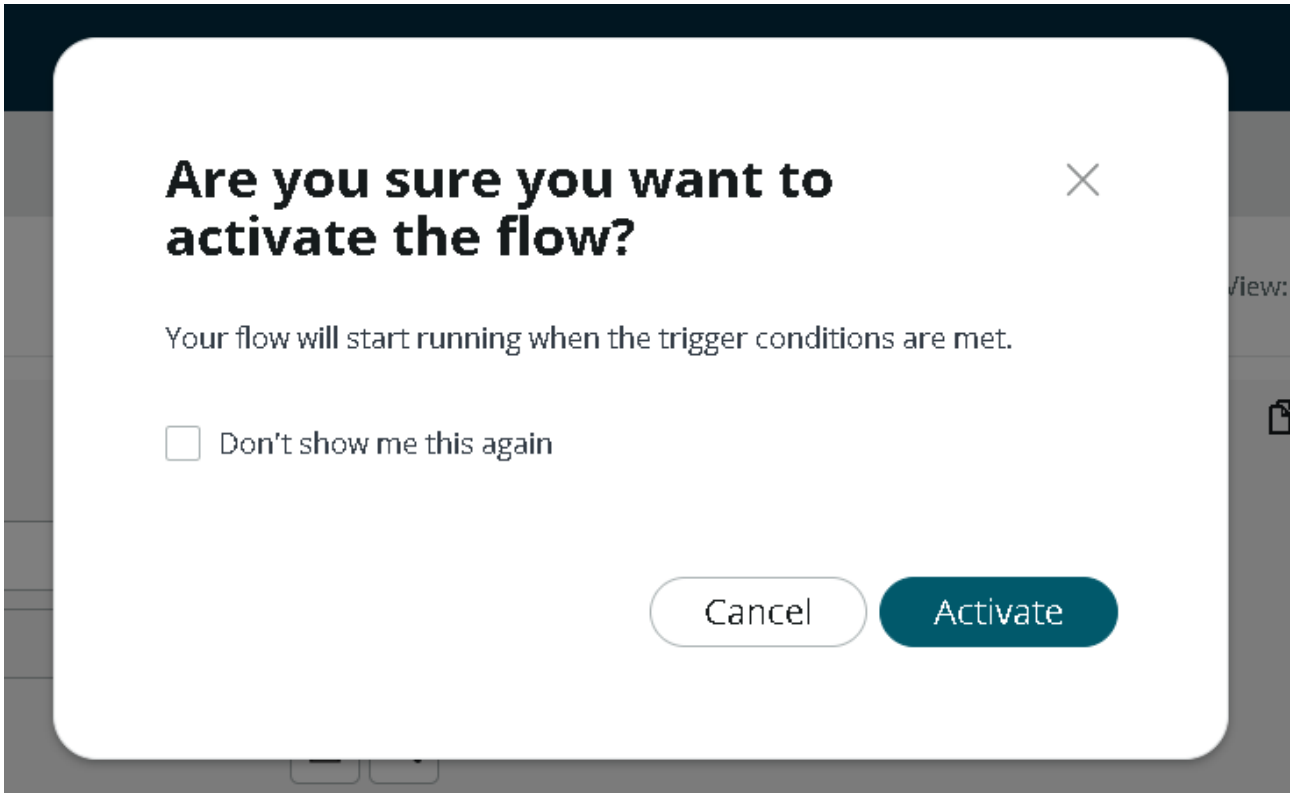

9. Click on **Add a trigger**.
10. In the trigger search, type "**Service Catalog**" and select it.
11. Click on **Done**.

Part 2: Add the Action

1. Under Actions, click on **Add an action**.
2. Select action, search for "**Create Catalog Task**" and select it.
3. Mention these in the action:
    - Action as **Create Catalog Task**.
    - Drag and drop the **Requested Item Record** into the Request Item field.
    - Table will be auto-populated as **Catalog Task**.
    - Short description: "**Laptop need to Configured**".
    - Click on **Add field value**.
    - Select **Description** field and value as "**Laptop need to Configured**".
    - Select **Assignment group** field and value as "**Hardware**".
    - Select **Approval** field and value as "**Approved**".

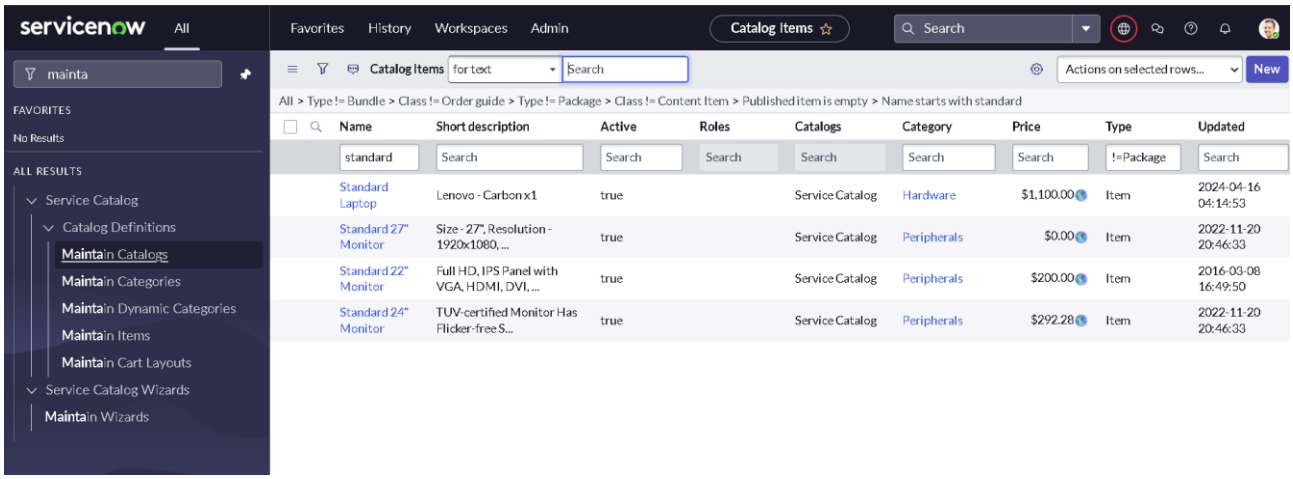

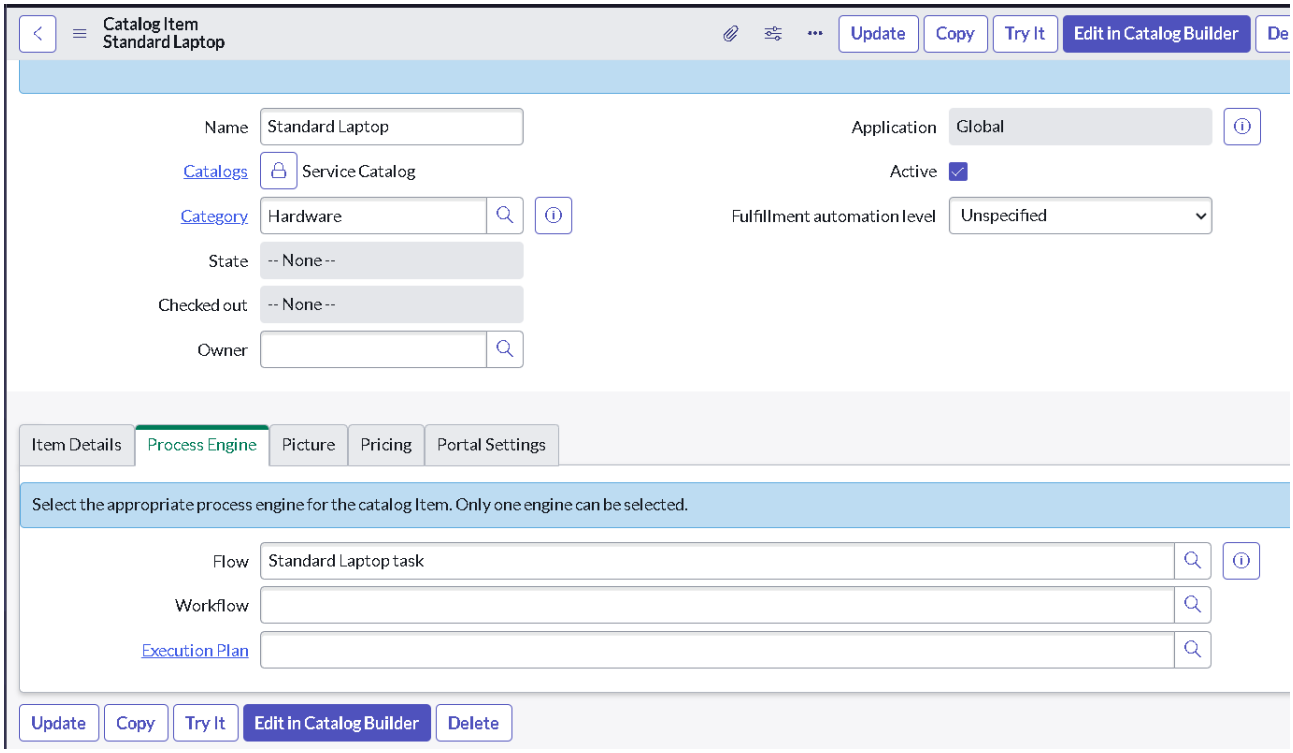

4. Leave the remaining as default and click on **Done**.
5. Click on **Save** the Flow.
6. Click on **Activate**, and click on **Activate** again to confirm.

Part 3: Attach the Flow to the Catalog Item

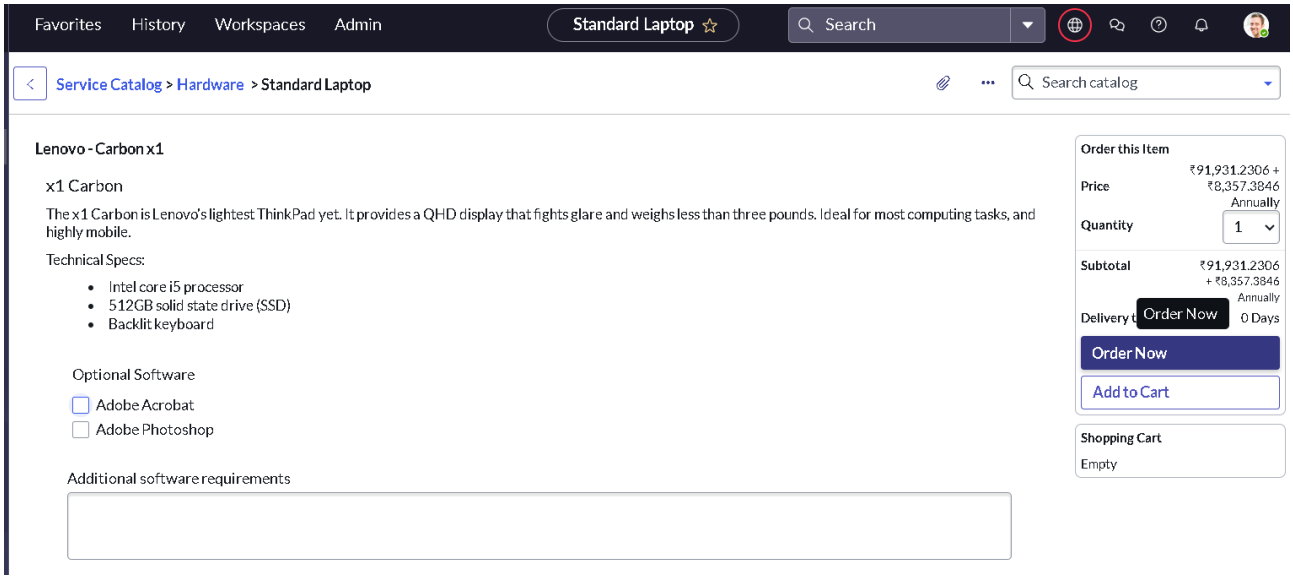

1. Open ServiceNow.
2. Click on **All** and search for **Maintain Items**.
3. Select **Maintain Items**.
4. Under the Name field, search for **Standard Laptop** and select that record.
5. Under that record, select **Process engine**.
6. Remove the remaining automations and add **Flow**.
7. Add the flow created with the name "**Standard Laptop Task**".
8. Click on the menu to **Save** the record.

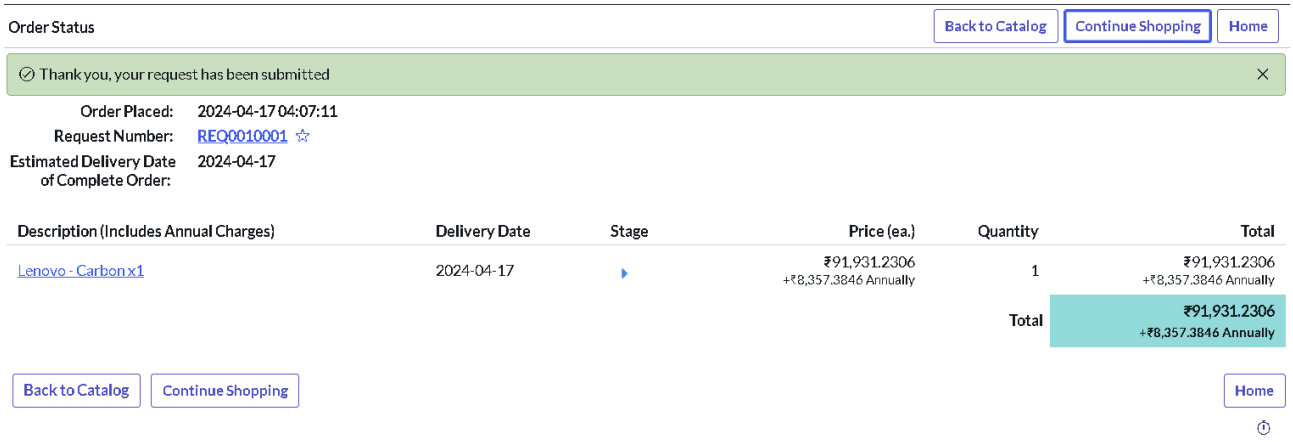

Part 4: Order the Item

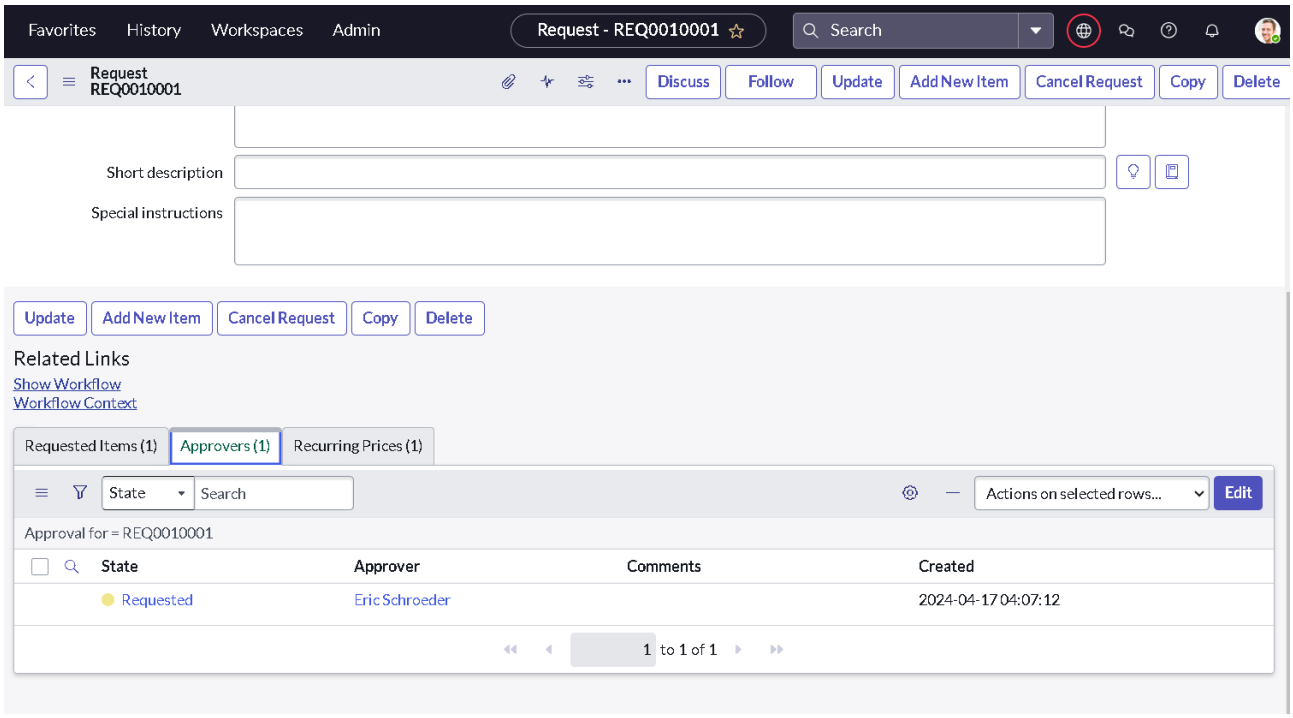

1. Click on **All** >> search for "**Service Catalog**".
2. Click on **Service Catalog** >> click on **Hardware**.
3. Scroll a bit to find "**Standard Laptop**" and click on it.
4. Click on "**Order Now**" to place the request.

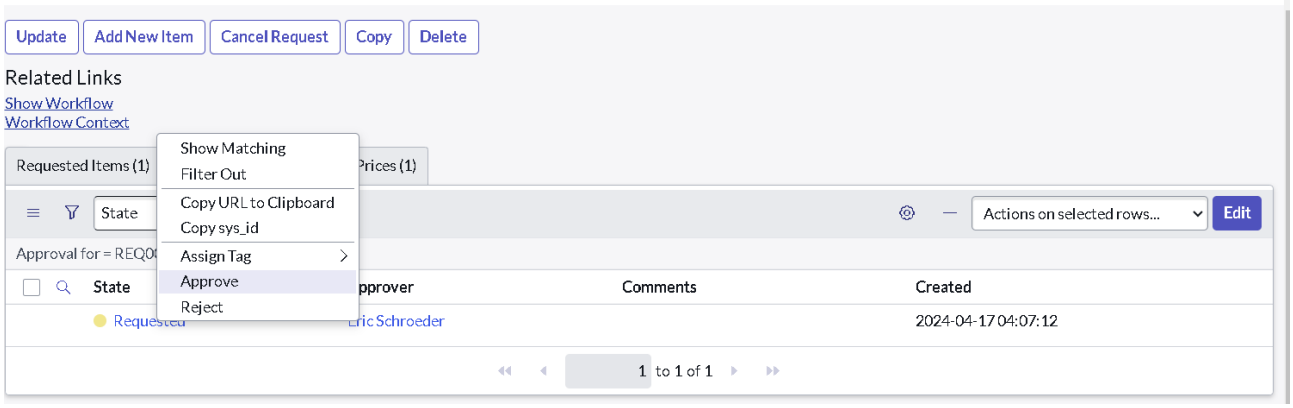

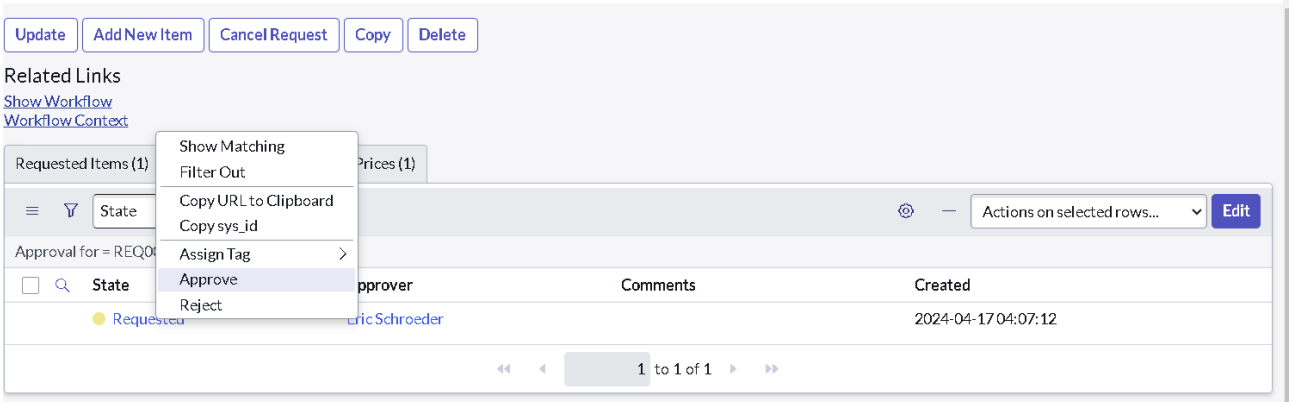

Part 5: Check the Order Status

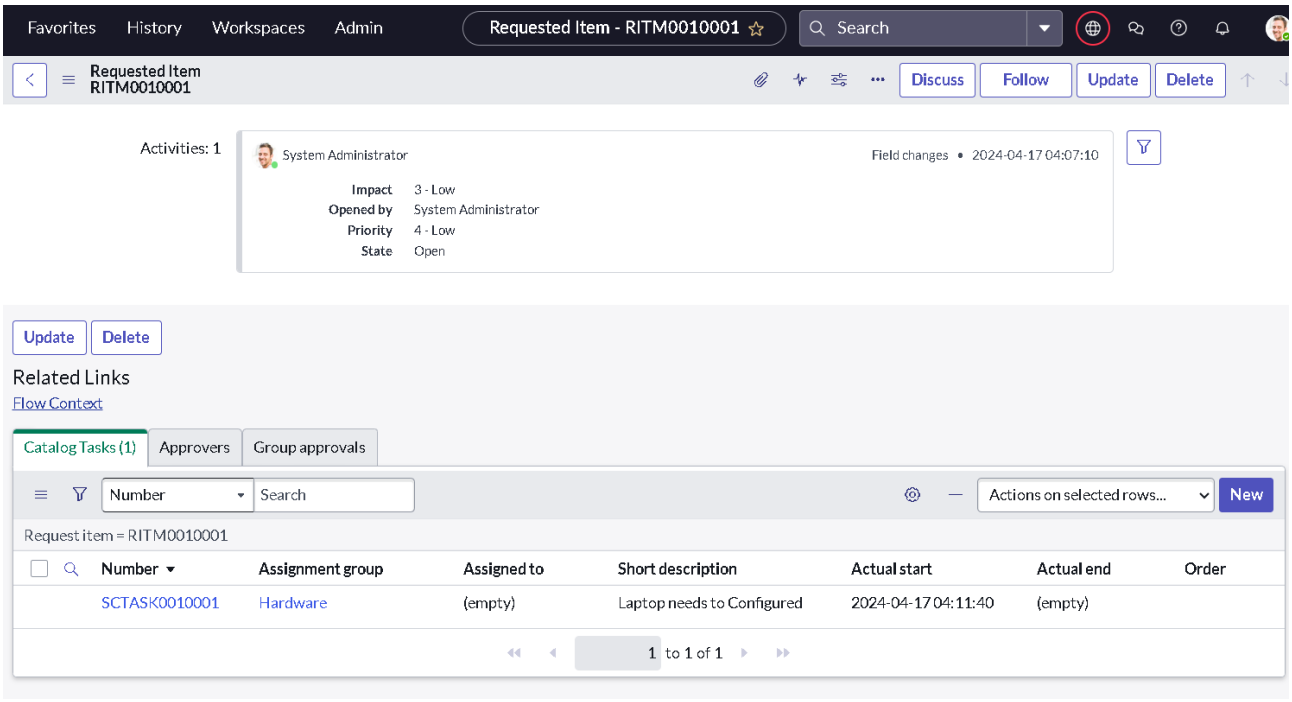

1. Now check the **Order Status** page.
2. Click on the **Request Number**.

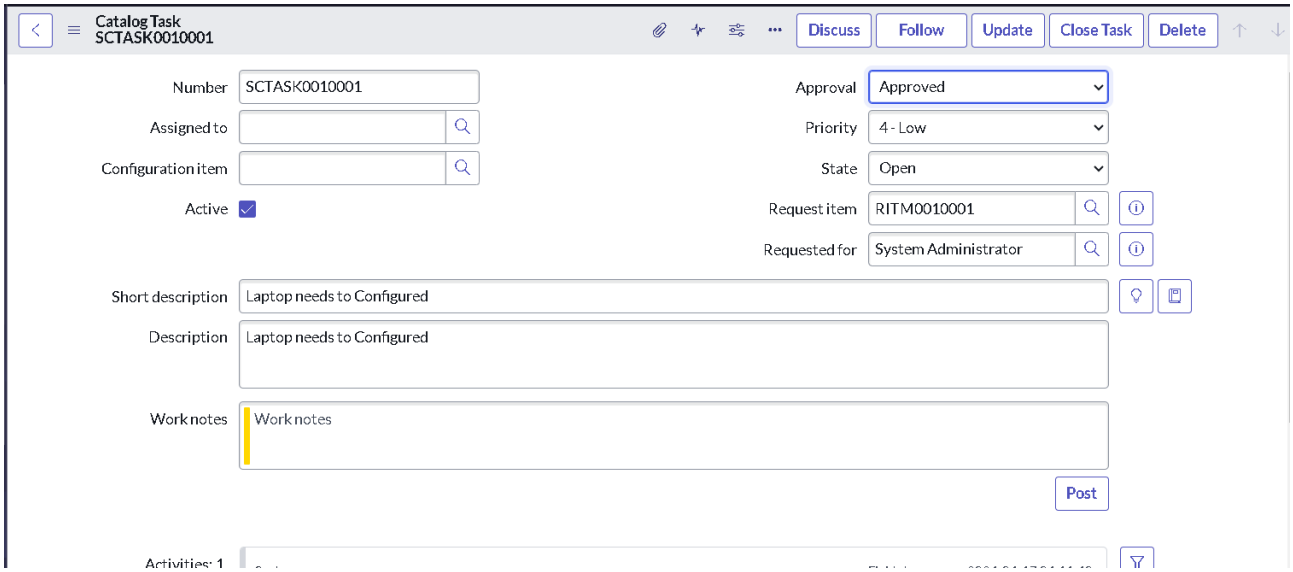

3. It will open the Request record.
4. Scroll down and click on the **Approvers** section.

5. Scroll down to the "**Catalog Tasks**" section.
6. Open the record to see the updated status, along with the **Short description** and **Assignment group**.

Part 6: Conclusion

The Standard Laptop Procurement Automation project was successfully completed using ServiceNow Flow Designer. The project automates the process of creating a catalog task after a laptop request is approved. When a user submits a request through the Service Catalog, it goes for approval. Once approved, the flow automatically creates a task and assigns it to the Hardware group.This automation reduces manual work, avoids human errors, and ensures that all approved requests are quickly sent to the hardware team for further action. Overall, it makes the IT procurement process faster and more efficient.
